

# THE REMAIKE PROJECT

- **OBJECTIVE:** recreate a famous painting with the use of artificial intelligence.
- **LANGUAGE FOCUS:** physical descriptions, present continuous, prepositions of place.
- **TOOLS NEEDED:** Microsoft Copilot (you need a hotmail or Microsoft account, your GVA student account works, Craiyon (no need to create an account but it doesn't allow adjustments) or any other generative AI.

## INSTRUCTIONS TO GIVE PROMPTS TO THE AI:

- Your **prompt** (order for the AI) must be **as detailed as possible**. Every single detail is important.
- **Start** by saying what you want: "I want you to create a very realistic painting."
- In your prompt mention:

1) **All the elements** in the painting. (There is/are)

2) **The position of** the elements (The man is sitting next to the baby)

3) **A physical description** of the elements (what do they look like? What are they wearing? Be specific!)

4) **What the elements of the picture are doing** (Present continuous)

- If you don't like the result the AI gives you, **ask for any necessary changes** (not available in Craiyon). Tell the AI it has made some mistakes (Example: Can you please generate a new image? This time remember the main is sitting next to the baby, not next to the river. Example: the baby is wearing a yellow t-shirt not a green one. Please correct this).

## TASK:

**On AULES you will upload 3 things:**

- **2 photos** (format JPG, PNG): the original painting and your remake.
- **1 document** (format WORD or PDF): your prompt (instructions) for the AI. Include every adjustment you asked for, every message you sent to the AI.
